

Christian Counseling Service remains open
to provide counseling support through
Telemental Health and Telephone during the
COVID-19 crisis.

Call our Intake Specialists at 909-793-1078.

We remain open and available to support our community during this difficult time. All our clinicians are trained to provide counseling support through video conference, and telephone counseling. We have counselors available who specialize in services for children, families, teens, adults, couples, those affected by trauma, and current and former military personnel and their families.

Any computer, tablet, or even a smart phone with a camera can connect you with our counselors. If a device with a camera is not available, in some cases our therapists can provide counseling support with just a phone call.

We have resources available to provide many services through our county and state programs, and accept most insurances.
