

City of Redlands

COVID-19 Prevention Program

December, 2020

COVID-19 Prevention Program (CPP)

This CPP is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace and to provide employees a healthy and safe workplace

Nothing in this CPP precludes the City of Redlands from complying with federal, state, or local laws or guidance that recommends, or requires, measures that are more prescriptive and/or restrictive than are provided herein.

Date: December, 2020

Authority and Responsibility

Tommi Ng, Assistant Director, HR/Risk Management has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

Definitions

For the purposes of the CPP, the following definitions shall apply:

“COVID-19” means coronavirus disease, an infectious disease caused by the severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) and related variants.

“COVID-19 case” means a person who either: (1) Has a positive “COVID-19 test” as defined in this section; (2) Is subject to COVID-19-related order to isolate issued by a local or state health official; or (3) Has died due to COVID-19, in the determination of a local health department or per inclusion in the COVID-19 statistics of a county. A person is no longer a “COVID-19 case” when a licensed health care professional determines that the person does not have COVID-19, in accordance with recommendations made by the California Department of Public Health (CDPH) or the local health department pursuant to authority granted under the Health and Safety Code or title 17, California Code of Regulations to CDPH or the local health department.

“Close contact COVID-19 exposure” means being within six (6) feet of a COVID-19 case for a cumulative total of 15 minutes or greater in any 24-hour period within or overlapping with the “high-risk exposure period” as defined here. This definition applies regardless of the use of face coverings.

“COVID-19 hazard” means exposure to potentially infectious material that may contain SARS-CoV-2, the virus that causes COVID-19. Potentially infectious materials include airborne droplets, small particle aerosols, and airborne droplet nuclei, which most commonly result from a person or persons exhaling, talking or vocalizing, coughing, sneezing, or procedures performed on persons which may aerosolize saliva or respiratory tract fluids, among other things. This also includes objects or surfaces that may be contaminated with SARS-CoV-2.

“COVID-19 symptoms” means one of the following: (1) fever of 100.4 degrees Fahrenheit or higher or chills; (2) cough; (3) shortness of breath or difficulty breathing; (4) fatigue; (5) muscle or body aches; (6) headache; (7) new loss of taste or smell; (8) sore throat; (9) congestion or runny nose; (10) nausea or vomiting; or (11) diarrhea, unless a licensed health care professional determines the person’s symptoms were caused by a known condition other than COVID-19.

“COVID-19 test” means a viral test for SARS-CoV-2 that is both: (1) Approved by the United States Food and Drug Administration (FDA) or has an Emergency Use Authorization from the FDA to diagnose current infection with the SARS-CoV-2 virus; and (2) Administered in accordance with the FDA approval or the FDA Emergency Use Authorization as applicable.

“Exposed workplace” means any work location, working area, or common area at work used or

accessed by a COVID-19 case during the high-risk period, including bathrooms, walkways, hallways, aisles, break or eating areas, and waiting areas.

The exposed workplace does not include buildings or facilities not entered by a COVID-19 case. Effective January 1, 2021, the “exposed workplace” also includes but is not limited to the “worksites” of the COVID-19 case as defined by Labor Code section 6409.6(d)(5).

“**Face covering**” means a tightly woven fabric or non-woven material with no visible holes or openings, which covers the nose and mouth.

“**High-risk exposure period**” means the following time period: (1) For persons who develop COVID-19 symptoms: from two (2) days before they first develop symptoms until ten (10) days after symptoms first appeared, and 24 hours have passed with no fever, without the use of fever-reducing medications, and symptoms have improved; or (2) For persons who test positive who never develop COVID-19 symptoms: from two (2) days before until ten (10) days after the specimen for their first positive test for COVID-19 was collected.

Identification and Evaluation of COVID-19 Hazards

Each Department Director will be responsible for the following:

- Conduct workplace-specific evaluations of their area using the **Appendix A: Identification of COVID-19 Hazards** form.
- Evaluate employees’ potential workplace exposures to all persons at, or who may enter, our workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections** form as needed to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures. Completed inspection forms should be submitted Human Resources.

Employee participation

Employees and their authorized employees’ representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by notifying their supervisors or Human Resources of potential hazards encountered in the workplace as well as any suggestions for correction.

Employee screening

The City possesses authority to screen employees or require that employees conduct a self-screen for COVID-19 symptoms prior to entering City worksites and facilities. The City will screen employees by either self-screening questions according to CDPH or CDC guidelines or by measuring temperatures with non-contact thermometers prior to entering certain facilities and worksites.

Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures will be documented on the **Appendix B: COVID-19 Inspections** form, and corrected in a timely manner based on the severity of the hazards, as follows:

Each Department Director will be responsible for assessing and identifying hazards within their area. Hazards will be reported to Facilities and Community Services and Human Resources. Facilities will follow up to ensure timely correction based on severity of the hazard.

Control of COVID-19 Hazards

Physical Distancing

Where possible, the City will ensure at least six feet of physical distancing at all times in our workplace by:

- Reducing the need for workers to be in the workplace – e.g., telework or other remote work arrangements.
- Reducing the number of persons in an area at one time, including visitors.
- Visual cues such as signs and floor markings to indicate where employees and others should be located or their direction and path of travel.
- Staggered arrival, departure, work, and break times.
- Adjusted work processes or procedures

Individuals will be kept as far apart as possible when there are situations where six feet of physical distancing cannot be achieved. Plexiglas barriers have been installed on public counters and between cubicles that are less than six feet apart.

Face Coverings

The City will provide clean, undamaged face coverings and ensure they are properly worn by employees over the nose and mouth when indoors, and when outdoors and less than six feet away from another person, including non-employees, and where required by orders from the California Department of Public Health (CDPH) or local health department. The City has posted signage to inform non-employees that the City requires the use of face coverings at City worksites and facilities. Face coverings are available through department supervisors or at various entrances to facilities and worksites. If an employee encounters a non-employee that is not wearing a face covering, the employee should advise them of the requirement. If the non-employee refuses to comply with the requirement, this should be reported to a supervisor or manager. The City reserves the right to refuse service to those that do not comply with the face mask requirement.

The following are exceptions to the use of face coverings in our workplace:

- When an employee is alone in a room.
- While eating and drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees wearing respiratory protection in accordance with CCR Title 8 section 5144 or other safety orders.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability as determined by the reasonable accommodation process, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.
- Specific tasks that cannot feasibly or safely be performed with a face covering, where employees will be kept at least six feet apart.

Any employee not wearing a face covering, face shield with a drape or other effective alternative, or respiratory protection, for any reason, shall be at least six feet apart from all other persons. The City does not use COVID-19 testing as an alternative to face coverings when face coverings are otherwise required by this section.

Engineering controls

The City implemented the following measures for situations where we cannot maintain at least six feet between individuals:

- Plexiglas barriers have been installed on public counters and between workspaces that are not six feet apart.

The City maximized, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems by:

- Where possible, doors and windows will remain open to allow for maximization of outside air flow. Ensuring most of the City's HVAC systems incorporate outside air into the buildings via manual dampers or economizers.
- Replacing and upgrading air filters throughout City facilities.

Cleaning and Disinfecting

The City implemented the following cleaning and disinfection measures for frequently touched surfaces:

- Disinfectant spray and clean towels have been provided to every city department and disinfectant refills and clean towels are available upon request. An outside towel service has been contracted to resupply the City with clean towels every week.
- An outside janitorial service has been contracted to clean and sanitize restroom facilities daily. Worksites will be cleaned throughout the week based on occupancy and utilization.

Should we have a COVID-19 case in our workplace, we will implement the following procedures:

- Cleaning and disinfecting the worksite, including common areas, equipment and other potentially infected areas;
- Minimizing shared equipment between workers; for equipment that must be shared, conducting frequent cleaning between worker use; and
- Training workers on safe use of cleaners and disinfectants and provide necessary protective equipment.

Shared tools, equipment and personal protective equipment (PPE)

PPE must not be shared, e.g., gloves, goggles and face shields.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible. Where there must be sharing, employees must disinfect the items between uses. Disinfectant will be provided to each department to accomplish this. Disinfectant may be requested through the Facilities and Community Services Department as needed.

Sharing of vehicles will be minimized to the extent feasible, and high-touch points (for example, steering wheel, door handles, seatbelt buckles, armrests, shifter, etc.) will be disinfected between users.

Hand sanitizing

In order to implement effective hand sanitizing procedures, we:

- Evaluated handwashing facilities and determined the need for additional facilities.
- Encourage and allow time for employee handwashing.
- Provide employees with an effective hand sanitizer, and prohibit hand sanitizers that contain methanol (i.e. methyl alcohol).
- Encourage employees to wash their hands for at least 20 seconds each time.

Personal protective equipment (PPE) used to control employees' exposure to COVID-19

The City evaluates the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.

When it comes to respiratory protection, we evaluate the need in accordance with CCR Title 8 section 5144 when the physical distancing requirements are not feasible or maintained.

We provide and ensure use of eye protection and respiratory protection in accordance with section 5144 when employees are exposed to procedures that may aerosolize potentially infectious material such as saliva or respiratory tract fluids.

Investigating and Responding to COVID-19 Cases

System for Communicating

The City's goal is to ensure that we have effective two-way communication with our employees and that it includes the following information:

- City employees must immediately report to their manager or the Office of Human Resources any presentation of COVID-19 symptoms, any possible COVID-19 close contact exposures, or possible COVID-19 hazards at City worksites or facilities;
- The City will not discriminate or retaliate against any employee who makes such a report;
- Employees requesting accommodation employees with medical or other conditions that put them at increased risk of severe COVID-19 illness must contact the Office of Human Resources to initiate the reasonable accommodation process;
- Employees can obtain voluntary testing at various locations including through the County at the University of Redlands, your personal medical provider, or other urgent care locations. Testing sites within the county can be found at www.sbcovid19.com/testing-sites/;
- In the event we are required to provide testing because of a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test;
- Information about COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.

COVID-19 Prevention in Employer-Provided Transportation to and from Work

Physical distancing and face coverings

The City will ensure that the:

- Physical distancing and face covering requirements of our CPP are followed for employees waiting for transportation.
- Vehicle drivers and all passengers are separated by at least three feet in all directions during the operation of the vehicle, regardless of the vehicle's normal capacity. Vehicle driver and all passengers are provided and wear a face covering in the vehicle as required by our CPP.

Screening

The City will require that all drivers and riders self-screen prior to boarding shared transportation.

Cleaning and disinfecting

The City will provide sanitizing materials, training on how to use them properly, and ensure they are kept in adequate supply to ensure that:

- All high-contact surfaces (door handles, seatbelt buckles, armrests, etc.) used by passengers are cleaned and disinfected before each trip.
- All high-contact surfaces used by drivers, such as the steering wheel, armrests, seatbelt buckles, door handles and shifter, are cleaned and disinfected between different drivers.

Ventilation

The City will ensure that vehicle windows are kept open, and the ventilation system set to maximize outdoor air and not set to recirculate air. Windows do not have to be kept open if one or more of the following conditions exist:

- The vehicle has functioning air conditioning in use and the outside temperature is greater than 90 degrees Fahrenheit.
- The vehicle has functioning heating in use and the outside temperature is less than 60 degrees

Fahrenheit.

- Protection is needed from weather conditions, such as rain or snow.
- The vehicle has a cabin air filter in use and the U.S. EPA Air Quality Index for any pollutant is greater than 100.

Hand hygiene

We will provide hand sanitizer in each vehicle and ensure that all drivers and riders sanitize their hands before entering and exiting the vehicle. Hand sanitizers with methyl alcohol are prohibited.

Training and Instruction

The City will provide training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards.
- Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
 - COVID-19 is an infectious disease that can be spread through the air.
 - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
 - An infectious person may have no symptoms.
- Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment - face coverings are intended to primarily protect other individuals from the wearer of the face covering.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.

Training will be documented either by the online training system or training rosters.

Exclusion of COVID-19 Cases

Where the City has a COVID-19 case in the workplace, we will limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees with COVID-19 exposure from the workplace for 10 days after the last known COVID-19 exposure to a COVID-19 case.
- Continuing and maintaining an employee's earnings, seniority, and all other employee rights and benefits whenever we've demonstrated that the COVID-19 exposure is work related. This will be accomplished by employer provided sick leave and/or workers compensation disability payments. When an exposure is not work related, employees may utilize employer provided leave benefits or other available leave as provided by law.
- Providing employees at the time of exclusion with information on available benefits.

Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases at our workplace to the local health department whenever

- required by law, and provide any related information requested by the local health department.
- Report immediately to Cal/OSHA any COVID-19-related serious illnesses or death, as defined under CCR Title 8 section 330(h), of an employee occurring in our place of employment or in connection with any employment.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with CCR Title 8 section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Maintain a record of and track all COVID-19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

Multiple COVID-19 Infections and COVID-19 Outbreaks

A COVID-19 Outbreak is defined as three or more COVID-19 cases at a worksite within a 14-day period or as identified by a local health department. This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 14-day period.

COVID-19 testing

- The City will provide COVID-19 testing to all employees in our exposed workplace except for employees who were not present during the period of an outbreak identified by a local health department or the relevant 14-day period. COVID-19 testing will be provided at no cost to employees during employees' working hours.
- COVID-19 testing consists of the following:
 - All employees in our exposed workplace will be immediately tested and then tested again one week later. Negative COVID-19 test results of employees with COVID-19 exposure will not impact the duration of any quarantine period required by, or orders issued by, the local health department.
 - After the first two COVID-19 tests, we will continue to provide COVID-19 testing of employees who remain at the workplace at least once per week, or more frequently if recommended by the local health department, until there are no new COVID-19 cases detected in our workplace for a 14-day period.
 - We will provide additional testing when deemed necessary by Cal/OSHA.

Exclusion of COVID-19 cases

We will ensure COVID-19 cases and employees who had COVID-19 exposure are excluded from the workplace in accordance with our CPP Exclusion of COVID-19 Cases and Return to Work Criteria requirements, and local health officer orders if applicable.

Investigation of workplace COVID-19 illness

We will immediately investigate and determine possible workplace-related factors that contributed to the COVID-19 outbreak in accordance with our CPP Investigating and Responding to COVID-19 Cases.

COVID-19 investigation, review and hazard correction

In addition to our CPP Identification and Evaluation of COVID-19 Hazards and Correction of COVID-19 Hazards, we will immediately perform a review of potentially relevant COVID-19 policies, procedures, and controls and implement changes as needed to prevent further spread of COVID-19.

The investigation and review will be documented and include:

- Investigation of new or unabated COVID-19 hazards including:
 - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
 - Our COVID-19 testing policies.

- Insufficient outdoor air.
- Insufficient air filtration.
- Lack of physical distancing.
- Updating the review:
 - Every thirty days that the outbreak continues.
 - In response to new information or to new or previously unrecognized COVID-19 hazards.
 - When otherwise necessary.
- Implementing changes to reduce the transmission of COVID-19 based on the investigation and review. We will consider:
 - Moving indoor tasks outdoors or having them performed remotely.
 - Increasing outdoor air supply when work is done indoors.
 - Improving air filtration.
 - Increasing physical distancing as much as possible.
 - Respiratory protection.

Notifications to the local health department

- Immediately, but no longer than 48 hours after learning of three or more COVID-19 cases in our workplace, we will contact the local health department for guidance on preventing the further spread of COVID-19 within the workplace.
- We will provide to the local health department the total number of COVID-19 cases and for each COVID-19 case, the name, contact information, occupation, workplace location, business address, the hospitalization and/or fatality status, and North American Industry Classification System code of the workplace of the COVID-19 case, and any other information requested by the local health department. We will continue to give notice to the local health department of any subsequent COVID-19 cases at our workplace.

Major COVID-19 Outbreaks

A major COVID-19 outbreak is defined as 20 or more COVID-19 cases within a 30-day period. This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 14-day period.

COVID-19 testing

The City will provide twice a week COVID-19 testing, or more frequently if recommended by the local health department, to all employees present at our exposed workplace during the relevant 30-day period(s) and who remain at the workplace. COVID-19 testing will be provided at no cost to employees during employees' working hours.

Exclusion of COVID-19 cases

We will ensure COVID-19 cases and employees with COVID-19 exposure are excluded from the workplace in accordance with our CPP Exclusion of COVID-19 Cases and Return to Work Criteria, and any relevant local health department orders.

Investigation of workplace COVID-19 illnesses

We will comply with the requirements of our CPP Investigating and Responding to COVID-19 Cases.

COVID-19 hazard correction

In addition to the requirements of our CPP Correction of COVID-19 Hazards, the City will take the following actions:

- In buildings or structures with mechanical ventilation, we will filter recirculated air with Minimum

Efficiency Reporting Value (MERV) 13 or higher efficiency filters if compatible with the ventilation system. If MERV-13 or higher filters are not compatible with the ventilation system, we will use filters with the highest compatible filtering efficiency. We will also evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems would reduce the risk of transmission and implement their use to the degree feasible.

- We will determine the need for a respiratory protection program or changes to an existing respiratory protection program under CCR Title 8 section 5144 to address COVID-19 hazards.
- We will evaluate whether to halt some or all operations at our workplace until COVID-19 hazards have been corrected
- Implement any other control measures deemed necessary by Cal/OSHA.

Notifications to the local health department

We will comply with the requirements of our Multiple COVID-19 Infections and COVID-19 Outbreaks-Notifications to the Local Health Department.

Return-to-Work Criteria

- COVID-19 cases with COVID-19 symptoms will not return to work until all the following have occurred:
 - At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications.
 - COVID-19 symptoms have improved.
 - At least 10 days have passed since COVID-19 symptoms first appeared.
 - COVID-19 cases who tested positive but never developed COVID-19 symptoms will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
 - A negative COVID-19 test will not be required for an employee to return to work.
 - If an order to isolate or quarantine an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period will be 10 days from the time the order to isolate was effective, or 14 days from the time the order to quarantine was effective.
 - If there are no violations of state or local health officer orders for isolation or quarantine, Cal/OSHA may, upon request, allow employees to return to work on the basis that the removal of employees would create undue risk to a community's health and safety. In such cases, the City will develop, implement, and maintain effective control measure to prevent transmission in the workplace including providing isolation for the employees at the worksite or facility and, if isolation is not possible, the use of respiratory protection in the workplace.
-

Appendix B: COVID-19 Inspections

This form is to be utilized to inspect City worksites and facilities to identify unhealthy conditions, work practices, and work procedures related to COVID-19. Please refer to www.dir.ca.gov/dosh/coronavirus/ for additional guidance on what to regularly inspect for, including issues that may be more pertinent to your particular type of work and add additional controls as necessary.

Date: _____

Name of person conducting the inspection: _____

Work location evaluated: _____

| Exposure Controls | Status | Person Assigned to Correct | Date Corrected |
|--|--------|----------------------------|----------------|
| Engineering | | | |
| Barriers/partitions | | | |
| Ventilation (amount of fresh air and filtration maximized) | | | |
| Additional room air filtration | | | |
| Additional Controls: | | | |
| | | | |
| Administrative | | | |
| Physical distancing | | | |
| Surface cleaning and disinfection (frequently enough and adequate supplies) | | | |
| Hand washing facilities (adequate numbers and supplies) | | | |
| Disinfecting and hand sanitizing solutions being used according to manufacturer instructions | | | |
| Additional Controls: | | | |
| | | | |
| PPE (not shared, available and being worn) | | | |
| Face coverings (cleaned sufficiently often) | | | |
| Gloves | | | |
| Face shields/goggles | | | |
| Respiratory protection | | | |

Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or symptoms will be kept confidential. All COVID-19 testing or related medical services provided by us will be provided in a manner that ensures the confidentiality of employees, with the exception of unredacted information on COVID-19 cases that will be provided immediately upon request to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH), or as otherwise required by law.

All employees' medical records will also be kept confidential and not disclosed or reported without the employee's express written consent to any person within or outside the workplace, with the following exceptions: (1) Unredacted medical records provided to the local health department, CDPH, Cal/OSHA, NIOSH, or as otherwise required by law immediately upon request; and (2) Records that do not contain individually identifiable medical information or from which individually identifiable medical information has been removed.

Name of person(s) conducting the investigation: _____

Date: _____

----- EMPLOYEE (OR NON-EMPLOYEE INFORMATION) -----

Employee (or non-employee) Name: _____ Date investigation was initiated: _____

Occupation (if non-employee, why they were in the workplace): _____

Location where employee worked (or non-employee was present in the workplace): _____

----- COVID-19 INVESTIGATION INFORMATION -----

Was COVID-19 test offered? YES NO

Date of the positive or negative test and/or diagnosis: _____

Date and Time the COVID-19 case was present in the workplace: _____

Date the case first had one or more COVID-19 symptoms: _____

Information received regarding COVID-19 test results and onset of symptoms (attach documentation):

Cough Fever or Chills Body Aches Headache Sore Throat Fatigue

Shortness of Breath or Difficulty Breathing Loss of Taste or Smell Diarrhea

Congestion or Runny Nose Nausea or Vomiting

Results of the evaluation of the COVID-19 case and all locations at the workplace that may have been visited by the COVID-19 case during the high-risk exposure period, and who may have been exposed (attach additional information):

----- NOTICE OF POTENTIAL COVID-19 EXPOSURE -----

Name of the employees that were notified **AND** date (All employees who may have had COVID-19 exposure and their authorized representatives):

Name of the individuals that were notified **AND** date (Independent contractors and other employers present at the workplace during the high-risk exposure period):

What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?

What could be done to reduce exposure to COVID-19?

Was local health department notified? YES NO

Date local health department was notified: _____
