

- (3) An approved safety pool cover, as defined in subdivision (d) of Section 5 .
- (4) Exit alarms on the private single family home's doors that provide direct access to the swimming pool and/or spa. The exit alarm may cause either an alarm noise or a verbal warning, such as a repeating notification that the door to the pool is open.
- (5) A self-closing, self-latching device with a release mechanism placed no lower than 54 inches above the floor on the private single family home's doors providing direct access to the swimming pool or spa.
- (6) An alarm that, when placed in a swimming pool or spa, will sound upon detection of accidental or unauthorized entrance into the water. The alarm shall meet and be independently certified to ASTM Standard Standard Safety Specification for Residential Pool Alarms, which includes surface motion, pressure, sonar, laser, and infrared type alarms.
- (7) Other means of protection, if the degree of protection afforded is equal to or greater than that afforded by any of the features set forth above and had been independently verified by an approved testing laboratory as meeting standards for those features established by ASTM or the American Society of Mechanical Engineers (ASME).
